1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 33-41 been renumbered 32-40.

2. The following is an examiner's statement of reasons for allowance:

In their RESPONSE TO FINAL OFFICE ACTION dated February 6, 2006, applicants argue that the primary reference relied upon in the final rejection, Nguyen et al (6,209,643), does not teach or disclose placing a tackifying composition into a subterranean formation to form a coating one or more particulates present in the formation prior to placing the tackifying composition. Such argument(s) is noted, however references to Weaver et al (5,871,049; 5775425) disclose, in one embodiment, injection or placement of a tackifying composition into the formation after previous emplacement of gravel pack particulates and/or proppants, in order to coat such particulate or proppant. Such references, however, fail to teach the injection of an after-flush into the formation in their processes. In this regard, the references make reference to the use of an after-flush fluid in prior art well-treatment processes, but such use or injection is for the purpose of providing a hardening agent, not required in the use of a tackifying composition which is not intended to harden in the formation. Moreover, the references teach that such emplaced tackifying composition or tackifier is for the purpose of trapping debris or fines during subsequent flowback (Weaver et al '425 at col. 7, line 60 - col. 8, line 38) ; hence, there would

not appear to be any motivation for injecting an after-flush, which could displace the tackifying composition or reduce its coating thickness on the previously emplaced particulates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
